

METOX

SANITIZER ACID CLEANER FOR FOAM TREATMENTS

APPLICATIONS:

METOX is a concentrated buffered acid and **SANITIZER**. It is used for cleaning food circuits and working equipments by foam generators.

This concentrated acid allows to eliminate limestone, milkstone, beerstone at low cost and quickly. **METOX** melts the limestone and sanitizes, avoids contamination by bacteria, seaweed, spores, molds. Eliminates bad odours and leaves surfaces sparkling clean. Its formulation allows quick reduction of foam.

INSTRUCTIONS:

To be used with foam generators, concentration of 1 - 5 % it depends on how much crust. Let it work for 10 min. and rinse.

This kind of formulation allows a high wetting power and the elimination of fats.

You'll get a shining surface that will quickly dry, and a **SANITIZED** surface, in a quickly and economic solution.

COMPONENTS:

Phosphoric Acid , Glycol Ethers
non-ionic surfactants biodegradable > 90% -

CHEMICAL - PHYSICAL DATA:

Status: Liquid
pH.: 2 to 1 %

Foam: High
Colour: Yellow
Odour: None

CAUTION:

Wear suitable clothes and gloves, protect eyes and face.

Corrosive. Causes severe burns. In case of contact with eyes or face, rinse immediately with plenty of water and seek medical advice.

Keep away from alkaline products.
