

POLISH

ENGINE, TYRES, PLASTIC RENEWER FOR INTERNAL AND EXTERNAL USE

APPLICAZIONE : AN ONLY PRODUCT - MANY USES!!

POLISH is a **RENEWER** that gives **PROTECTION** on surfaces.

Very easy to use and leave no remains.

Does not alter materials natural colour and leaves them as new. May be used in any surface such as: Wood, Plastic, Metal.

Leaves a gloss film but not shiny to avoid sun reflection.

Treated surfaces are easier to clean.

HOW TO USE:

USE AS IT IS

spray **POLISH** directly on surfaces. **NO NEED** to rub.

Product spreads by itself, without leaving remains.

ENGINE: After washing the engine, and while engine is still wet, spray **POLISH** everywhere (Plastic, metals, tubes, bacteria etc ...) Let it dry by itself.

TYRES: spray **POLISH** on all surfaces surfaces and let it dry by itself.
No need to rub.

PLASTIC and BANDS: Many cars have plastic black bands that can pass on by strong alkaline cleaners.
Spray these pieces with **POLISH**, may give the original look.
