

**GAMMA M*****M 1******SPARK*****SANITIZER LIMESTONE DISSOLVER
FOR POLISHED SURFACES*****DO NOT USE ON MARBLE***

***RANGE "M" is an ECONOMIC MAINTENANCE range
DERIVED FROM THE CORRESPONDING CONCENTRATED PRODUCTS***

APPLICATIONS :

SPARK is an acid SANITIZER cleaner which dries quickly
eliminates mineral salts left by hard water.

Used on pottery, polished equipments, taps, showers etc..

It is a strong and fast product to use for a good hygiene maintenance
and to avoid the growth of bad microorganisms.

Its chemical composition eliminates bacteria, molds, seaweed.

It also, eliminates soap remains, and oil remains.

Surfaces dry quickly, this avoids limestone formation.

INSTRUCTIONS :

SPARK is ready to use, spray on cloth or on surface.

Spray on surface, let it work. Its action appears immediately.

Crust melts away quickly and surfaces turn bright clean.

Surfaces are free from bacteria's and other microorganisms.

When rinsing, water quickly drips off from surfaces.

Being an acid, it harms marble.
